

[P] Infinite Shelter - Task #2644

ItemModal should color match the theme. Right now, it's too light against dark theme.

Description			
This is neither too difficult nor very easy. Other tasks should be done first. The difficulty is that the ItemModal may be in a shared library, packaged as an npm module, so changing it requires a local wiring for working on the library. I can explain once we put this ticket in "in progress".
