I know very little about these guys, have little time to do research on my own, and would like an article about these guys.

This is due to their industry and the fact that I'll have to follow their progress, going forward.

NFT integration gives users true ownership and the ability to buy, sell, trade, and play-and-earn in-game assets. Immutable X is built using StarkWare's StarkEx cutting-edge zero-knowledge proof technology, which rolls up hundreds of thousands of transactions into one while positioning users to safely secure digital assets directly on Ethereum. This enables Immutable to provide game developers and all NFT creators with unparalleled throughput and zero gas fees for trading and minting NFTs in a carbon-neutral environment, empowering them to create billions of low-cost, in-game assets that can easily be bought and sold.
