Description			
<p>The most recent update to Google Translate android app is so terrible, that I can no longer use it, and am looking for another translator. This also presents an opportunity for WasyaCo to publish its own translator app.</p> <p>Instead of Google Translate, lets use Yandex Translate as the basis of the UI: https://play.google.com/store/apps/details?id=ru.yandex.translate&hl=en_US&gl=US</p> <p>The task is to re-create the UI panels of the translator, in figma. You don't have to recreate everything exactly. It just needs to be very similar.</p>
