<b>Description</b>			
<p>Currently on mobile, <a href="https://wasya.co">https://wasya.co</a> does not make it immediately obvious that i18n (multi-language) support is available.</p> <p>I'd like to see flags, representing available languages, above fold on mobile.</p> <p>The website is wordpress, so it has a menu that is mobile-only menu. This is separate from the site's menu. Let's add the mobile menu that will have only language selection. It should not be hidden behind a hamburger icon. It should not be sticky or fixed - it should scroll along with the rest of the page.</p> <p>There are currently 3 languages: en, es, pt. You should not anticipate more than 5 languages.</p> <p>Only figma deliverable can be accepted.</p>
