

[P] Infinite Shelter - Task #2795

Contractor: Ruby on rails developer (newsitem pagination)

2022-12-10 12:26 PM - victor piousbox

Status:	New	Start date:	2022-12-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	DEV ROR JS	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>Need a ruby on rails developer. I have a pretty advanced project that needs feature development. This request is specifically for WIRING PAGINATION into the LIST OF NEWSITEMS in a SITE, using gem kaminari-mongoid. The database is mongo, writing rspec when coding is required, using git is required, and the app is split into 3 engine gems: the model layer, administrative layer (a full app), and the api layer (a headless app). Each one is test-driven. Plus a rails project that connects the three. So it's an advanced setup, and you should have more than 1 year of ruby experience overall and definitely some experience writing rspec. In your response, please answer the following in the first sentence: what's 16-8/3? In your second sentence, please answer: what is your OS and text editor? For bonus points, answer: what is one specific, useful method provided by ActiveRecord? Success with this task will lead to more similar work in the future. Thanks!</p>			

History

#1 - 2023-03-08 03:59 PM - victor piousbox

- Target version set to 2023W10

#2 - 2023-03-08 04:05 PM - victor piousbox
