

[P] Infinite Shelter - Task #3135

Translate wasyaco.com to spanish

2023-10-03 06:49 PM - victor piousbox

Status:	New	Start date:	2023-10-03
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Drupal	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour

Description

- This is a simple task. Translate <https://wasyaco.com> to spanish. The most difficult part of it is setting up drupal locally.
- you must be able to setup drupal with required modules locally!

- you must be able to write php code in local themes and modules!
- You can use chatgpt, or google translate, to translate the content. Therefore, the task is easy.
- Attached is the site map. Although there are more pages on this site, this task is for translating **only** the pages on the sitemap.
- attached are composer json and lock files.
- I will provide the database (mysql) dump
- I will provide technical support and help you setup the project. (I am a senior developer myself.)
- additional themes and modules are (you only need to install them, not change them):
 - ** https://github.com/wasya-co/ish_drupal_theme
 - ** https://github.com/wasya-co/ish_drupal_module
 - ** https://github.com/wasya-co/wco_drupal_theme
- ** note: in each repo, the most current version is 0.x.0 where "x" is the **latest** number, so for example for ish_drupal_module, the latest branch is 0.1.0
